

The Liberator by Solar Mobility LLC the First Solar Assisted Powered Wheelchair

THE LIBERATOR POWERED WHEELCHAIR:

This powered wheelchair is the most clinically advanced technology today for the disabled. The future in Seating has arrived. This 100% American made powered wheelchair has many different options and capacities than any other chair on the market today.

(Pressure mapping upon request)

With the simple touch of a button the user can dial in their own position, in so doing, they have dialed in their own "air ride suspension system" allowing the chair to take ALL jarring and friction. Making for a smooth ride, and ease of mind knowing you aren't getting painful problems associated with ALL other chairs and patients without the Liberator.

This chair is a collaboration between Solar Mobility LLC, and an American Seating Company, who has been in business since 1855; they make seats for Caterpillar, John Deere, Case, Freightliner, New Holland etc. Their Specialty is seating. Solar Mobility LLC is Proud to unveil the newest and most clinically proven advancement in comfort and seating for the powered wheelchair market ever built.

Contact your VA representative TODAY. Tell them, "I am a veteran and INEED IT NOW".

The Liberator by Solar Mobility LLC is the first solar power assisted wheelchair on the market.

The Solar Companion still supplies solar power to the wheelchair even when it's in the down position.
